ADG's UBS offers a feature-rich solution in an easy-to-use, best-of-breed package.

- *Customer Self-service: UBS is a comprehensive utilities management and billing package that offers customer interfaces to view past transactions, consumption history, and make online payments*
- *End User Customizable: It also offers customizable menus and reports on a per user basis to serve the needs of each individual role within a utilities organization*
- *Integrated Work Order System: Whether you need to schedule a re-read, fix a broken line, or change out a meter, our integrated work order system can handle it*
- *Backflow Tracking System: is designed to help you efficiently monitor and ensure compliance with your backflow regulatory requirements more efficiently and streamline the process*
